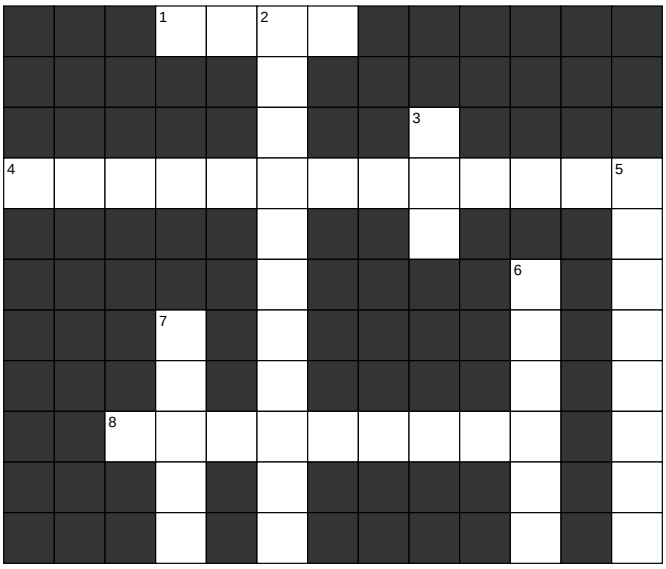
Objects

Crossword - Chapter review

Use chapter concepts to solve the clues. Omit spaces and punctuation in the grid.



Across

1. A _____ stores values in order.

4. In this chapter, an object is a _____ with string keys.

8. `vertex_copy` maintains a _____, a mapping from each original container's identity to its copy.

Down

2. A _____ makes a new outer container and keeps references to the original nested values.

3. Each named part is a field: a string _____, such as `"score"`, associated with a value, such as `87`.

5. Vertex's `slice` and `tail` make shallow copies of sequences; `copy` makes a _____, recursively copying nested mutable values.

6. An _____ lets us name those parts of the entry:

7. Each named part is a _____: a string key, such as `"score"`, associated with a value, such as `87`.
